WHY IS WRITING SO IMPORTANT?

IMPORTANCE OF OUR APPROACH AND PLAN FOR TEACHING AND SUPPORTING WRITING

- Confident
- Brave
- Participation
- Making
- Building
- Contributing

www.PowerOfATech.info

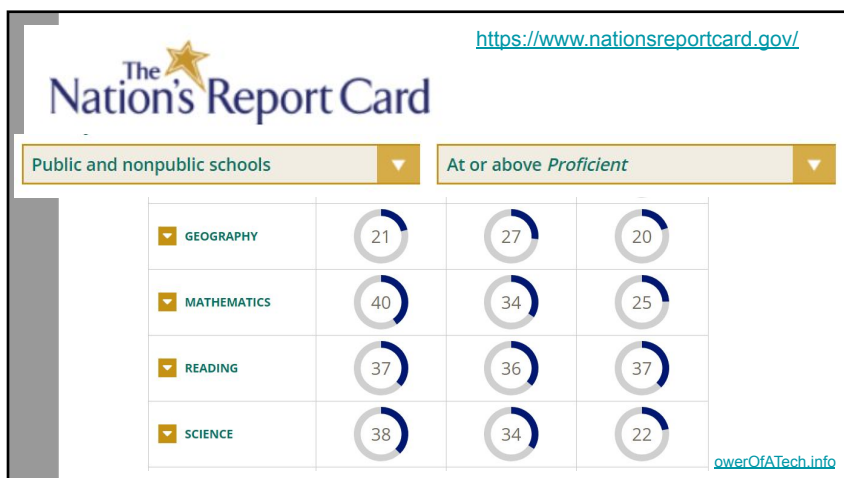

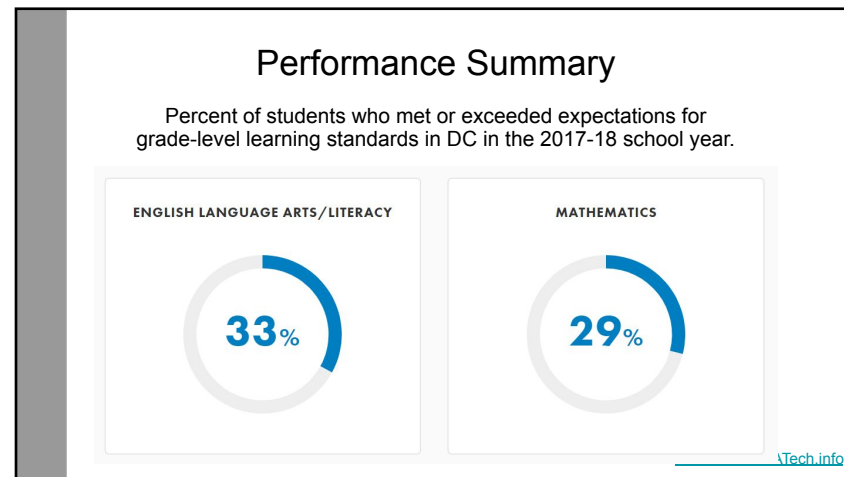

"Albert Einstein said Creativity is Contagious. Pass it on. Whatever you want to put out into the world, your art, your ideas, your dreams, your knowledge, your creativity; share it with the world. Because when you do that you inspire others to do the same and it has a domino effect. It helps you create a more beautiful world, a braver world where people have the courage to share themselves and their information and their creativity. A braver society where people have the courage to do the things that they want to do because they see that you are doing it and they see that other people have done it."

SHARE YOUR IDEAS WITH THE WORLD

Bridgette Nicholson www.powerofatech.info

**Assistive Technology can,
and DOES have
significant, positive
impact.**

The research and the data shows it.

1. Voice Recording

Dictating to adult:

- Increases dependence
- Reduces creativity
- NOT independent thought and work!

www.PowerOfATech.info

Voice Speech Talking

ALL kids of all cognitive
and grade levels

Think about YOUR students
Skill areas
Relative strengths

www.PowerOfATech.info

Creativity Storytelling Confidence

From a young age kids love talking
and telling stories:

Intuitive
Expansive
Confident
Fun
Production of information
with NO mechanics

www.PowerOfATech.info

Speech IN / Talking / Voice Recording

Voice only, no text

A powerful means for students to produce independent
work!

Use of voice for writing and documenting thoughts, ideas,
information

Dictating to an assistant / teacher / parent

Dictating to a computer / voice recorder / other
technology

Independence and achievement vs. dependence and
assisted work

www.PowerOfATech.info

Who can or should use Voice Recording?

Students with:

- Intelligible and those with speech challenges
- Many thoughts, ideas and information
- Poor handwriting or typing
- Poor spelling
- Poor motivation for writing
- Non verbal students using AAC devices
- Any student who needs to brainstorm or quickly record
information

www.PowerOfATech.info

Benefits of using Voice Recording for Writing

Using student's relative strength!

For ALL verbal students AND nonverbal students using AAC devices,
regardless of cognitive level.

Reduced mechanics, increased efficiency

Quality of speech NOT important

Quality of content increases

www.PowerOfATech.info

Stages of Training for Voice Recording

Need strategies and carefully planned introduction and training

Using a microphone and voice recording is not automatic success

Can be highly successful with the right training

OR can be negative/not as successful

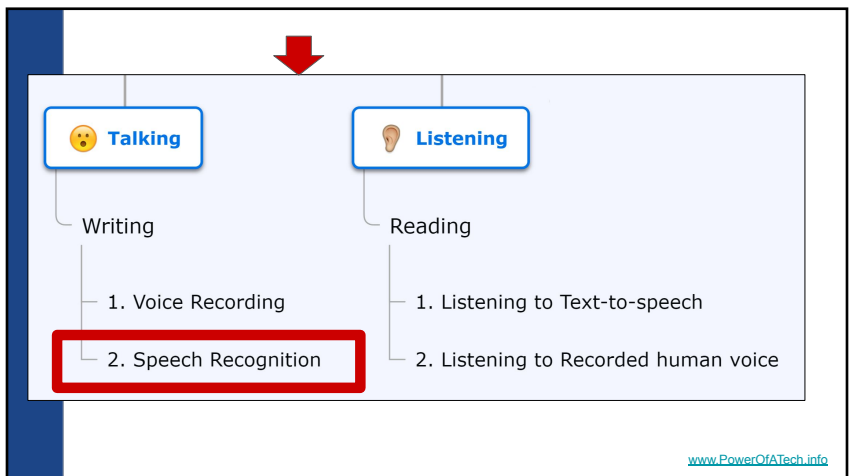

www.PowerOfATech.info

Stages of Training for Voice Recording

1. Voice play
2. Voice email and voice chatting
3. Basic dictation into documents
4. Voice annotation
5. Mapping with voice
6. Stand-alone voice files
7. Dictating longer answers / papers
8. Hand-held recording
9. Audio editing
10. Podcasting

www.PowerOfATech.info

www.PowerOfATech.info

2. Speech Recognition

Speech to Text Technology - massive improvement
More potential for greater numbers of students now

www.PowerOfATech.info

Speech-to-Text Technology **SIGNIFICANT IMPROVEMENTS**

Greater Accuracy
Lower Cost or Free
Available on many platforms
(hardware and software)

Speech Recognition, with the right approach and training, has great potential to improve students writing.

Exciting options with new speech integration into regular technology all around us!

www.PowerOfATech.info

- More complex than voice recording:
 - Accuracy of dictation
 - Only for students with 'adequate' articulation
 - 'Adequate articulation' hard to quantify
 - More complex cognitive task (writing process, reading, editing)
- Overall more complex BUT great benefit for some students
- PLANNED AND STRUCTURED APPROACH TO TRAINING IS ESSENTIAL

Speech Recognition cannot and should not be 'plug-n-play'.

Need planning and training for greatest success.

www.PowerOfATech.info

TRAINING APPROACH and STEPS for SPEECH RECOGNITION (SR)

Before speech recognition, start with voice recording, it's

- motivating
- easy
- conversational
- a GREAT precursor for skill development prior to SR
- many other benefits...

VOICE RECORDING - transcribed by adult after recording

I also play Minecraft on the computer. I've never, I've never... When I played it, a lot of times, every time when I played it, I didn't see the Minecraft Creeper, and I went, and I burned up my lame house, and I went into it one time and I got stuck in it. My house in Minecraft, I burned up. I burned it up because it was lame. Because it was a lame house. That's all I remember that I play. ... on the computer.

I play in the snow. I pretend that the snow and ice are gold.
I pretend that they are gold. I also make snow angels. That's all I do in the snow. I go down the... I do it in Royal Oak Park. I have one brother, I don't have any sisters.
I play the Wii. I play Wii Sports Resort. I also play Super Mario Galaxy II Wii. At first, I didn't play because at first I didn't really want to play as a Star in Super Mario Wii.
And, in Super Mario Galaxy, Wii's a star that Player 2 has to play as, is in a bubble all the time, and it can, and that Star can spin. And that car can, and that star can spin.
Cause all the characters in Super Mario Wii get to spin, and in that, and that, in Super Mario Galaxy II Wii, you have to, the Player 2 has to play as a Star.
Nope, it doesn't do, nope, it doesn't do anything special.
I don't know if there are more fun things or not.

One time, he was recording his voice for a project.
My brother. I might eventually have to do that for my project. Because he did that in school, so I probably will do that.

(Student recorded this information with no support or prewriting strategies, transcribed by teacher after recording)

[Listen to student's voice writing](#)

The Great Wall of China was built to protect the Chinese from the Mongol invasions during the Ching dynasty. The wall stretches from the Northeast coast of China 2000 miles to the Southwest coast. The wall took billions of people to build but it cost over a million lives in deaths. The wall is built is a single wall that covers the whole fences of China. There was originally a series of smaller walls going all over China. The wall, 2000 years later, is falling apart because of erosion and neglection. The wall of China is an international symbol onfoods and company symbols. The Mongols are the greatest horseback riders that ever existed. The wall is not build right on the border of China but in of the border at least on the modern border.

Voice Recording = 105 words per minute

www.PowerOfATech.info

SPEECH RECOGNITION

Student #2

Dictated using speech recognition (15 minutes after initial voice enrollment) with assistance for corrections:

The Great Wall of China. It was built in the Ching Dynasty. The wall was built to protect the Chinese people from the Mongol invaders. The Great Wall of China took billions of people to build and millions died. The Great Wall of China took 14 years to build. The Great Wall of China 2000 years later is falling apart because the wall is being neglected and of tourists. A Great Wall of China was built from the north east coast to the southwest coast stretching 2000 miles. There was originally a series of walls. The Great Wall of China took 14 years to build the Mongol invaders were the greatest cavalry Army ever.

Abraham Lincoln was the 16th president. He was born in Kentucky. He loved to read. He had a mom and dad, a brother and sister and four kids and a wife. When he was 9 years old his mom died. His dad got married when he was 10 years old. When his sister died it made him sad. His son Edward Baker Lincoln died when he was only three years old. His son William Wallace Lincoln died when he was only 11 years old. His son Tad Lincoln died when he was only 18 years old. Robert Todd Lincoln was his only son to grow up. Abraham Lincoln was the leader in the Civil War. He wrote the Gettysburg address and the Emancipation Proclamation. His height is 64. He was assassinated at Ford's theater by John Wilkes Booth. After the Civil War he died the next day at the Peterson house right across the street. He is buried in a cemetery called Lincoln's tomb with his family in Springfield. Abraham Lincoln was president for only four years.

VOICE WRITING

Tell me about this picture

The lion
the lion King is a movie
I want to watch that lion King movie.
Is it coming out?
What can you tell me about the lion?"

It roars!
Is it coming out, the lion King movie
what can you tell me about this lion?"
It roars!
tell me about some other things about the lion
it's got hair.

It's got hair, what else?

The lion, it's got hair, is got eyes, it's got ears, it's got big
teeth.
I'm going to cover this picture now. What can you tell me about
lions?

They fight! Scar in the lion King movie. Is it coming out today?

Listen to
student's

writing

www.PowerOfATech.info

Student #4

VOICE WRITING

What else can you tell me about lions?

They eat bugs. They roar.

What do they eat?

They eat meat

where do lions live?

On the big rock.

The lion has a big rock.

Do the males or the females normally do the hunting?

The females.

Is there anything else you can tell me about lions?

They sleep. The lion King movie. The big rock.
